CSC 151 Spring 2020
Topic: Files in Scheme

April 6, 2020

Day 27

Reflection Time

Spend 5 minutes writing, a response to this question. Even though we're not in class (and I will not collect this response), it's important to think periodically at a more meta-cognition level.
There are no "correct" responses to this reflection.

What have you learned in this class so far that will be helpful to you in the future?

In future classes outside of Computer Science?

Outside of Grinnell?

Self-Check

What's the difference between read-char and peek-char?

What's the difference between read-char and read?

What's the difference between display and write?

Review the reading if you're not sure of the answers.

Lab Time

Use the short reference at the bottom of the reading while doing this lab.

Note:
if you try to open an output port to a file that already exists, you may get an error. This note is included in Problem 5, but you may see an error much earlier than that.

You may need to *manually* delete a file which you wrote to, if you get this error (before completing Problem 5).

Upcoming Work

Submit all problems before the extras by Wednesday 4/8 at 10:30 pm Central Time.
Include 6P's for problems 2 and 6.
If a problem says to "determine" something, just include a brief statement about what you learned.

To: csc-151-02-grader@grinnell.edu
Subject: CSC 151-02 Lab 4/6

Exam 2 Revisions (Optional) Due April 10

Assignment 6 due Thursday.
